LED curtain

The innovative LED strip curtain is a unique solution only available at Pixel LED Solutions.

The ultralight LED strip curtain is composed of 60x60 cm modules and each of them weighs only 4 kg.

Designed for indoor and outdoor applications

Very good resolution - 37.5 mm

Transparent and perforated – curtains do not reflect the stage lighting

Lightweight and simple set-up – the solution comes ideal for non-traditional and large format stage designs

Multifunctional - strip curtain can act as a standard LED screen on condition that a large format screen is used and audiences are seated at least 30 metres from the screen

Applications

Non-standard LED solutions such as transparent screens on which back stage lighting can be directed

Light structures perfect for installation in various configurations

Technical Features:

Pixel composition	1R1G1B
Pitch	37.5 mm
White balance brightness	≥2000 CD/m ²
Unit weight	3.8 kg
Unit size	600x600x50 mm
Unit size with frames	600x600x65 mm
Power supply	230 V 47-63 Hz
Temperature	-20 – 50°C
Humidity	10%-90%

Unit size without frames: 600x600x50 mm
